

CASE STUDY

VisionFund

VISIONFUND INTERNATIONAL

is a microfinance organization that is part of World Vision, a Christian humanitarian NGO. Their mission is to provide financial services to vulnerable communities to help lift them out of poverty.

CUSTOMER CHALLENGES

- The centralization of their management information system in the Cloud.
- The reinforcement of the security of their Information and Management System
- The protection of their clients' socio-demographic data
- Allow the rural area to have access to the company's resources

SOLUTION**APPLICATION AND
INFRASTRUCTURE**

**Virtual server to host the SQL
server database**

Application server migration

**Deployment of a redundant app
server**

**Security and data protection of their
Information and Management System**

KEY RESULTS

Optimization of the cloud infrastructure

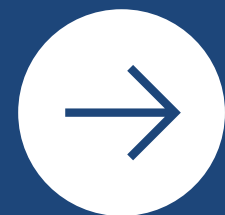

Implementation of a 24/7 support

**Securing the infrastructure with
azure defender**

Implementation of Azure BackUp

CUSTOMER TESTIMONIAL

“TransNumerik has answered all of Vision Fund's technical concerns. The experts allowed us to have a very good setup of our virtual machine and to migrate our data to the Cloud. We praise the professionalism of the entire TransNumerik team.”

JULES GOMIS, IT MANAGER.
